

Wet Weather

These days are wet.
Night air is cool and wet;
day air hot and wet.

Unless it rains,
which it does, often,
when air is wetter.

Mosquitoes like wet.
People don't;
even chickens and dogs don't.

Taking a bath does not help,
Lying down does not do much.
Moving is better, if wetter.

Swimming is best, perhaps.
Too bad
there are no beaches close by.
